

AUTO140G : Braking Systems

This course covers diagnosing, evaluating and servicing base brake systems, parking brake systems, anti-lock brake systems, and traction control systems. Students will machine drums and rotors using both on-car and off-car lathes, diagnose, evaluate and repair using pressure gauges, measuring tools, scan tools, oscilloscopes and multi-meters, and demonstrate safe use of all tools and equipment used in the course.

Credits 4

Theory Hours 2

Lab Hours 4

Prerequisites

[AUTO110G](#) with a C or better

Semester Offered

Summer semester
