

BIOL041G : Developmental Biology

This course will cover the main points of biology at the high school level. It is meant to replace or supplement students' background in biology if those students either never passed high school biology, or if they took the course too long ago to be prepared for further study of the life sciences. The course will give an overview of cell biology, the biology of organisms, and the biology of populations. These credits do not count toward graduation requirements.

Credits 3

Theory Hours 3

Lab Hours 0

Semester Offered

Fall/Spring semesters
