

BIOL110G : Human Anatomy and Physiology I

This course is designed to give a student of any health or medical science a thorough background in anatomy and physiology. Current, in-depth information is presented on the structure and function of human cells, tissues and organ systems, including the skin, skeletal, muscular, nervous and sensory systems. Laboratory work augments lecture topics and includes exercises in microscopy, the study of fresh and preserved specimens, and exercises in human physiology.

Credits 4

Theory Hours 3

Lab Hours 3

Prerequisites

Placement into college-level reading; C or better in high school biology or [BIOL041G](#) or [BIOL106G](#); successful completion of high school chemistry or [CHEM043G](#) recommended

Semester Offered

Fall/Spring semesters
